**Frequently Asked Questions**

What are the billing requirements specific to EPSDT?
- Use the appropriate diagnosis code when billing any EPSDT screening service, CPT® 99381-99395 (i.e., Z00.129 - Encounter for routine child health examination without abnormal findings).
- Bill for services such as laboratory work, hearing tests, x-rays, or immunization administration using the appropriate procedure code(s), along with the EPSDT screening (CPT® 99381 - 99395) on the same CMS-1500 claim form. [EPSDT Provider Guide 10-1-2015]

What if a problem is identified during a screening examination?
- If a health problem is identified during a screening examination, the provider may:
  - Refer the client to an appropriate agency provider or to the client’s agency-contracted managed care organization (MCO), if applicable, for medical treatment. Provide the service for the client (if in the provider’s scope of practice).
  - Conduct extended developmental testing using a standardized instrument completed by the provider or other trained personnel. [EPSDT Provider Guide - 10-1-2015]

What additional screening components may be billed?
- For fee-for-service clients, the following screening services may be billed in addition to the EPSDT screening codes
  - Appropriate audiometric tests (CPT® 92552 and 92553)
  - Appropriate laboratory tests, including testing for anemia
  - Appropriate testing for blood lead poisoning in children in high risk environments (CPT® 83655). When billing, use ICD 777.011 or Z13.88 (special screening for other conditions, chemical poisoning, and other contamination). Developmental screening (w/ interpretation and report CPT® 96110)
  - Developmental test extend (w/ interpretation and report CPT® 96111)
  - [EPSDT Provider Guide - 10-1-2015]

What is included on an *Initial Health Eval* for Foster Care patients?
- An IHE includes the following:
  - Height and weight for all children, and head circumference for children younger than age three
  - Careful examination of the entire body to include the unclothing of each body surface at some point during the examination — because some children entering foster care have been victims of physical or sexual abuse, note and document the following:
    - Any signs of recent or old trauma
    - Bruises, Scars, Deformities
    - Limitations in the function of body parts or organ systems
  - Appropriate imaging studies to screen for a recent or healing fracture — consider if there is a history of physical abuse before placement or if signs of recent physical trauma are present.
  - Genital and anal examination (all clients)
  - Laboratory tests for HIV and other STIs
  - Documentation and prompt treatment of other infections and communicable diseases
  - Evaluation of the status of any known chronic illness — to ensure that appropriate medications and treatments are available [EPSDT Provider Guide 10-1-2015]
