See Important Reminder at the end of this policy for important regulatory and legal information.

Policy Overview
Some services or procedures performed by providers may not have specific Current Procedure Codes (CPT) or HCPCS codes. When submitting claims for these services or procedures that are not otherwise specified, unlisted codes are designated. Unlisted codes provide the means of reporting and tracking services and procedures until a more specific code is established.

Application
This policy applies to claims containing procedure codes that are unlisted. Unlisted procedure codes should not be used when a more descriptive procedure code representing the service provided is available.

Policy Description
According to the Instructions for Use of the CPT Code book in the Current Procedural Terminology, select the name of the procedure or service that accurately identifies the service performed. Do not select a CPT code that merely approximates the service performed. If no such specific code exists, then report the service using the appropriate unlisted procedure or service code. When necessary, any modifying or extenuating circumstances are added. Any service or procedure should be adequately documented in the medical record.

Reimbursement
- Claims submitted with unlisted procedure codes and without supporting documentation are denied.
- Claims submitted with unlisted procedure codes are denied if after review, it is determined that a more appropriate procedure code is available.
- Additional reimbursement may not be provided for special techniques/equipment submitted with an unlisted procedure code.
- Unlisted procedure codes with a modifier appended are reviewed and may be denied.
- When performing two or more procedures that require the use of the same unlisted CPT code, the unlisted code should only be reported once to identify the services provided (excludes unlisted HCPCS codes; for example, DME/unlisted drugs).
- If the services bundle, the provider is sent a letter indicating such and the additional payment is denied.
- If the procedure is experimental, an authorization is required.

Documentation Requirements
Certain supporting documentation is required when filing a claim that includes unlisted procedure codes, because those codes do not describe or identify a specific procedure or service. That supporting documentation should contain the following pertinent information:

- A clear description of the nature, extent, and need for the procedure or service
- A detailed report that clarifies whether the procedure was performed independently from other services, or if it was performed at the same surgical site or through the same surgical opening as another procedure
- A description of an extenuating circumstances which may have complicated the service or procedure
- An account of the time, effort and equipment necessary to perform the procedure or provide the service
- A description of the number of times the procedure was performed or the services were provided

When submitting supporting documentation, designate the portion of the report that identifies the test or procedure associated with the unlisted procedure codes. Required information must be legible and clearly marked. Refer to the table below for the guidelines on documentation requirements.
