Payment Policy: Inpatient Only Procedures
Reference Number: CC.PP.018
Product Types: Medicaid & Medicare
Last Review Date: 11/01/2020

See Important Reminder at the end of this policy for important regulatory and legal information.

Policy Overview
The Centers for Medicare and Medicaid Services (CMS) has determined that certain procedures should only be performed in an inpatient setting and therefore, are not appropriate to be conducted in an outpatient facility setting. According to CMS,

Inpatient only services are generally, but not always, surgical services that require inpatient care because of the nature of the procedure, the typical underlying physical condition of patients who require the service or the need for at least 24 hours of postoperative recovery time or monitoring before the patient can be safely discharged.

Inpatient only procedures (IOP) are not payable under the Outpatient Prospective Payment System (OPPS). CMS designates IOP with an OPPS status indicator of “C” in the OPPS Addendum B. For the most current list, see https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalOutpatientPPS/Addendum-A-and-Addendum-B-Updates.html?DLSort=2&DLEntries=10&DLPage=1&DLSortDir=descending

Application
This policy applies to physicians and hospitals.

Policy Description

Reimbursement
The Health Plan’s clinical code auditing software will deny procedures that CMS determines should be performed in an inpatient only setting when billed in the outpatient setting.

State-specific rules, health plan contracts or health plan policies, may supersede this edit.

Utilization
Rationale for Edit

Because of the invasive nature of certain procedures, the need for at least 24 hours of postoperative recovery time or monitoring before a patient can be safely discharged, or the underlying physical condition of the patient requiring surgery, CMS has determined that certain procedures are safest when performed in an inpatient setting.
