Clinical Policy: Pegfilgrastim (Neulasta), Pegfilgrastim-jmdb (Fulphila), Pegfilgrastim-cbqv (Udenyca), Pegfilgrastim-bmez (Ziextenzo), Pegfilgrastin-apgf (Nyvepria)

Reference Number: CP.PHAR.296
Effective Date: 12.01.16
Last Review Date: 08.20
Line of Business: Commercial, HIM, Medicaid

See Important Reminder at the end of this policy for important regulatory and legal information.

Description
Pegfilgrastim (Neulasta®) and its biosimilars, pegfilgrastim-jmdb (Fulphila™), pegfilgrastim-cbqv (Udenyca™), pegfilgrastim-bmez (Ziextenzo™), and Pegfilgrastin-apgf (Nyvepria™) are leukocyte growth factors.

FDA Approved Indication(s)
Neulasta, Nyvepria, Fulphila, Udenyca, and Ziextenzo are indicated to decrease the incidence of infection, as manifested by febrile neutropenia, in patients with non-myeloid malignancies receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia (FN).

Neulasta is also indicated to increase survival in patients acutely exposed to myelosuppressive doses of radiation (hematopoietic subsyndrome of acute radiation syndrome).

Limitation(s) of use: Neulasta, Nyvepria, Fulphila, Udenyca, and Ziextenzo are not indicated for the mobilization of peripheral blood progenitor cells for hematopoietic stem cell transplantation.

Policy/Criteria
Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation® that Neulasta, Nyvepria, Fulphila, Udenyca, and Ziextenzo are medically necessary when the following criteria are met:

I. Initial Approval Criteria
   A. Chemotherapy-Induced Neutropenia (must meet all):
      1. Diagnosis of non-myeloid malignancy;
      2. Prescribed for use following myelosuppressive chemotherapy;
      3. One of the following (a or b)
         a. Request is for treatment associated with Stage IV or metastatic cancer for a State with regulations against step therapy in advanced oncology settings (see Appendix E);
         b. All of the following (i, ii and iii)
            i. For members age ≥ 18 years, failure of Zarxio, unless one of the following (1, 2, or 3):
CLINICAL POLICY
Pegfilgrastim, Pegfilgrastim-jmdb, Pegfilgrastim-cbqv, Pegfilgrastim-bmez, Pegfilgrastin-apgf

1. Member has intolerance or contraindication to Zarxio;
2. Documentation of member’s inability to self-administer Zarxio due to both of the following (a and b):
   a) Lack of caregiver or support system for assistance with administration;
   b) Inadequate access to healthcare facility or home care interventions;
3. Member requires ≥ 10 doses of Zarxio;
   *Prior authorization may be required for Zarxio
ii. Request is for a biosimilar pegfilgrastim product (i.e., Fulphila, Udenyca, Ziextenzo, Nyvepria);
iii. For requests other than Ziextenzo: Medical justification supports inability to use Ziextenzo* (e.g., contraindications to excipients);
   *Prior authorization may be required for Ziextenzo
4. For members receiving palliative chemotherapy, provider attestation that chemotherapy dose reduction has been considered;
5. Dose does not exceed 6 mg (1 syringe) per chemotherapy cycle.

Approval duration:
Medicaid/HIM – 6 months
Commercial – 6 months or to the member’s renewal date, whichever is longer

B. Acute Radiation Syndrome (must meet all):
1. Prescribed for use following suspected or confirmed acute exposure to myelosuppressive doses of radiation;
2. One of the following (a or b)
   a. Request is for treatment associated with Stage IV or metastatic cancer for a State with regulations against step therapy in advanced oncology settings (see Appendix E);
   b. All of the following (i, ii and iii)
      i. For members age ≥ 18 years, failure of Zarxio, unless one of the following (1, 2, or 3):
         1. Member has intolerance or contraindication to Zarxio;
         2. Documentation of member’s inability to self-administer Zarxio due to both of the following (a and b):
            a) Lack of caregiver or support system for assistance with administration;
            b) Inadequate access to healthcare facility or home care interventions;
         3. Member requires ≥ 10 doses of Zarxio;
            *Prior authorization may be required for Zarxio
      ii. Request is for a biosimilar pegfilgrastim product (i.e., Fulphila, Udenyca, Ziextenzo, Nyvepria);
      iii. For requests other than Ziextenzo: Medical justification supports inability to use Ziextenzo* (e.g., contraindications to excipients);
          *Prior authorization may be required for Ziextenzo
3. Dose does not exceed two 6 mg doses administered one week apart.

Approval duration:
Medicaid/HIM – 6 months
Commercial – 6 months or to the member’s renewal date, whichever is longer
C. Bone Marrow Transplantation (off-label) (must meet all):
   1. Prescribed for one of the following (a or b):
      a. Supportive care post autologous hematopoietic cell transplantation;
      b. Mobilization of peripheral-blood progenitor cells prior to autologous transplantation;
   2. Failure of Leukine®, unless contraindicated or clinically significant adverse effects are experienced;
      *Prior authorization may be required for Leukine
   3. One of the following (a or b)
      a. Request is for treatment associated with Stage IV or metastatic cancer for a State with regulations against step therapy in advanced oncology settings (see Appendix E);
      b. All of the following (i, ii and iii)
         i. For members age ≥ 18 years, failure of Zarxio, unless one of the following (1, 2, or 3):
            1. Member has intolerance or contraindication to Zarxio;
            2. Documentation of member’s inability to self-administer Zarxio due to both of the following (a and b):
               a) Lack of caregiver or support system for assistance with administration;
               b) Inadequate access to healthcare facility or home care interventions;
            3. Member requires ≥ 10 doses of Zarxio;
               *Prior authorization may be required for Zarxio
         ii. Request is for a biosimilar pegfilgrastim product (i.e., Fulphila, Udenyca, Ziextenzo, Nyvepria);
         iii. For requests other than Ziextenzo: Medical justification supports inability to use Ziextenzo* (e.g., contraindications to excipients);
            *Prior authorization may be required for Ziextenzo
   4. Request meets one of the following (a or b):
      a. Dose does not exceed 6 mg (1 syringe) per dose;
      b. Dose is supported by practice guidelines or peer-reviewed literature for the relevant off-label use (prescriber must submit supporting evidence).

Approval duration:
Medicaid/HIM – 6 months
Commercial – 6 months or to the member’s renewal date, whichever is longer

D. Other diagnoses/indications
   1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and CP.PMN.53 for Medicaid.

II. Continued Therapy
   A. All Indications in Section I (must meet all):
      1. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
      2. Member is responding positively to therapy;
3. One of the following (a or b)
   a. Request is for treatment associated with Stage IV or metastatic cancer for a State
      with regulations against step therapy in advanced oncology settings (see Appendix
      E);
   b. All of the following (i, ii and iii)
      i. For members age ≥ 18 years, failure of Zarxio, unless one of the following (1,
         2, or 3):
         1. Member has intolerance or contraindication to Zarxio;
         2. Documentation of member’s inability to self-administer Zarxio due to
            both of the following (a and b):
            a) Lack of caregiver or support system for assistance with administration;
            b) Inadequate access to healthcare facility or home care interventions;
         3. Member requires ≥ 10 doses of Zarxio;
            *Prior authorization may be required for Zarxio
      ii. Request is for a biosimilar pegfilgrastim product (i.e., Fulphila, Udenyca,
          Ziextenzo, Nyvepra);
      iii. For requests other than Ziextenzo: Medical justification supports inability to
           use Ziextenzo* (e.g., contraindications to excipients);
           *Prior authorization may be required for Ziextenzo

4. If request is for a dose increase, new dose does not exceed one of the following (a, b,
   or c):
   a. Chemotherapy-induced neutropenia: 6 mg (1 syringe) administered once per
      chemotherapy cycle;
   b. Acute radiation syndrome: two 6 mg doses administered one week apart;
   c. Bone marrow transplantation: 6 mg (1 syringe) per dose, or dose is supported by
      practice guidelines or peer-reviewed literature for the relevant off-label use
      (prescriber must submit supporting evidence).

Approval duration:
Medicaid/HIM – 6 months
Commercial – 6 months or to the member’s renewal date, whichever is longer

B. Other diagnoses/indications (must meet 1 or 2):
   1. Currently receiving medication via Centene benefit and documentation supports
      positive response to therapy.
      Approval duration: Duration of request or 6 months (whichever is less); or
   2. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT
      specifically listed under section III (Diagnoses/Indications for which coverage is
      NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance
      marketplace, and CP.PMN.53 for Medicaid.

III. Diagnoses/Indications for which coverage is NOT authorized:
   A. Non-FDA approved indications, which are not addressed in this policy, unless there is
      sufficient documentation of efficacy and safety according to the off label use policies –
      CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace, and
      CP.PMN.53 for Medicaid or evidence of coverage documents.
IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key
- ANC: absolute neutrophil count
- ASCO: American Society of Clinical Oncology
- CSFs: colony-stimulating factors
- FDA: Food and Drug Administration
- FN: febrile neutropenia
- NCCN: National Comprehensive Cancer Network

Appendix B: Therapeutic Alternatives
This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

<table>
<thead>
<tr>
<th>Drug Name</th>
<th>Dosing Regimen</th>
<th>Dose Limit/Maximum Dose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Neupogen® (filgrastim), Zarfico® (filgrastim-sndz), Granix® (tbo-filgrastim), Nivestym® (filgrastim-aapi)</td>
<td>Supportive care post autologous hematopoietic cell transplantation 10 mcg/kg IV or SC infusion QD</td>
<td>10 mcg/kg/day</td>
</tr>
<tr>

<td>250 mcg/m²/day</td>
</tr>
</tbody>
</table>

Therapeutic alternatives are listed as Brand name® (generic) when the drug is available by brand name only and generic (Brand name®) when the drug is available by both brand and generic.

Appendix C: Contraindications/Boxed Warnings
- Contraindication(s): history of serious allergic reactions to human granulocyte colony-stimulating factors such as pegfilgrastim or filgrastim products
- Boxed warning(s): none reported

Appendix D: General Information
- Neutropenia is defined as an absolute neutrophil count (ANC) of < 500 neutrophils/mcL or an ANC of < 1,000 neutrophils/mcL and a predicted decline to ≤ 500 neutrophils/mcL over the next 48 hours. Neutropenia can progress to FN, defined as a single temperature of ≥ 38.8 C orally or ≥ 38.0 C over 1 hour.
- The development of FN is a common dose-limiting toxicity of many chemotherapy regimens. This risk is directly related to the intensity of the chemotherapy regimen. Chemotherapy regimens that have an incidence of FN greater than 20% in clinical trials
CLINICAL POLICY
Pegfilgrastim, Pegfilgrastim-jmdb, Pegfilgrastim-cbqv, Pegfilgrastim-bmez, Pegfilgrastin-apgf

in chemotherapy naïve patients are considered by the National Comprehensive Cancer Network (NCCN) panel at high risk. Prophylaxis with myeloid growth factors is recommended at this level of risk (category 1 recommendation). NCCN Compendium recommend prophylaxis be considered in intermediate-risk (10-20% overall risk of FN) patients (category 2A recommendation). In addition to chemotherapy regimens, other risk factors such as: treatment-related, patient related, cancer-related, and co-morbidities have also been associated with an increased risk of FN. Therefore, the type of chemotherapy regimen is only one component of the risk assessment.

- Harvesting of peripheral blood stem cells prior to autologous stem-cell transplantation has a recommendation of Class IIa in DRUGDEX.
- The NCCN Compendium recommends Neulasta for supportive care post autologous hematopoietic cell transplant (category 2A).
- According to the ASCO, 2006 Clinical Practice Guideline for the Use of White Blood Cell Growth Factors, dose reduction or delay remains an appropriate strategy for the palliative treatment of cancer, as there is no evidence that dose maintenance or escalation improves clinically important outcomes in this setting. The 2015 updates to this guideline found no new data supporting the use of colony-stimulating factors (CSFs) to maintain dose-intensity in the treatment of metastatic disease, and the review found no demonstrable benefit in the use of myeloid growth factors to in patients with metastatic lung, small-cell lung, colorectal, hormone-refractory prostate, or breast cancer. To date, there have been no improvements in disease-free or OS reported for any common cancer with the use of CSFs to maintain dose-intensity, instead of dose reduction. The ASCO Panel recognizes that there may be individual patients who will not tolerate effective doses of chemotherapy without CSFs. Medical Oncologists making the decision to use prophylactic MGfs, or not, may need to consider not only the optimal chemotherapy regimen, but also the individual member risk factors and the intention of treatment; that is, curative, prolongation of life, or symptom control and palliation.

**Important Reminder**
This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise
professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

Note: For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
