Clinical Policy: Esketamine (Spravato)
Reference Number: CP.PMN.199
Effective Date: 06.01.19
Last Review Date: 11.20
Line of Business: Commercial, HIM, Medicaid

See Important Reminder at the end of this policy for important regulatory and legal information.

Description
Esketamine (Spravato™) is a non-competitive N-methyl D-aspartate (NMDA) receptor antagonist.

FDA Approved Indication(s)
Spravato, in conjunction with an oral antidepressant, is indicated for the treatment of:
• Treatment-resistant depression (TRD) in adults
• Depressive symptoms in adults with major depressive disorder (MDD) with acute suicidal ideation or behavior

Limitation(s) of use:
• Spravato is not approved as an anesthetic agent. The safety and effectiveness of Spravato as an anesthetic agent have not been established.
• The effectiveness of Spravato in preventing suicide or in reducing suicidal ideation or behavior has not been demonstrated. Use of Spravato does not preclude the need for hospitalization if clinically warranted, even if patients experience improvement after an initial dose of Spravato.

Policy/Criteria
Provider must submit documentation (such as office chart notes, lab results or other clinical information) supporting that member has met all approval criteria.

It is the policy of health plans affiliated with Centene Corporation® that Spravato is medically necessary when the following criteria are met:

I. Initial Approval Criteria
A. Treatment-Resistant Depression (must meet all):
1. Diagnosis of TRD;
2. Prescribed by or in consultation with a psychiatrist;
3. Age ≥ 18 and ≤ 65 years;
4. Member has a documented baseline Patient Health Questionnaire (PHQ-9) score of at least 15, indicating moderately severe major depression, within the previous four weeks (see Appendix D);
5. Failure of two antidepressants from at least two different classes at up to maximally indicated doses but no less than the commonly recognized minimum therapeutic doses, each used for ≥ 8 weeks, unless clinically significant adverse effects are experienced or all are contraindicated (e.g., selective serotonin reuptake inhibitor
[SSRI], serotonin-norepinephrine reuptake inhibitor [SNRI], tricyclic antidepressant [TCA], bupropion, mirtazapine);

6. Failure of two of the following antidepressant augmentation therapies, each used for ≥ 4 weeks, unless clinically significant adverse effects are experienced or all are contraindicated: second-generation antipsychotic, lithium, thyroid hormone, buspirone;

7. Currently stabilized on an oral antidepressant for at least two weeks (must not be one of the aforementioned agents previously failed);

8. Member meets one of the following (a or b):
   a. No prior history of treatment with Spravato;
   b. Documentation of a prior positive response to Spravato as documented by a history of ≥ 50% reduction in PHQ-9 score;

9. Dose does not exceed 168 mg per week during four week induction phase.

Approval duration: 3 months (up to 23 nasal spray devices)

B. Major Depressive Disorder with Suicidal Ideation or Behavior (must meet all):
   1. Diagnosis of MDD;
   2. Prescribed by or in consultation with a psychiatrist;
   3. Age ≥ 18 years;
   4. Spravato is prescribed in combination with initiation or optimization of oral antidepressant therapy;
   5. Member is recently (within the last 5 days) discharged from acute or subacute inpatient care for suicidality;

6. Member meets one of the following (a or b):
   a. No prior history of treatment with Spravato;
   b. Documentation of a prior positive response to Spravato (see Appendix E);

7. Member meets one of the following (a, b, or c):
   a. Montgomery-Åsberg Depression Rating Scale (MADRS) score is ≥ 20 (moderate depression) (see Appendix D);
   b. Hamilton Rating Scale for Depression (HAMD) score is ≥ 17 (moderate depression) (see Appendix D);
   c. PHQ-9 score is ≥ 15 (moderately severe depression) (see Appendix D);

8. Dose does not exceed 84 mg (3 nasal spray devices) twice weekly.

Approval duration: 4 weeks (up to 23 nasal spray devices)

C. Other diagnoses/indications
   1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace and CP.PMN.53 for Medicaid.

II. Continued Therapy
A. Treatment-Resistant Depression (must meet all):
   1. Currently receiving medication via Centene benefit or member has previously met initial approval criteria;
2. Member is responding positively to therapy as evidenced by at least a 50% reduction in PHQ-9 score compared to baseline (see Appendix D);
3. Spravato is being used in combination with an oral antidepressant;
4. If request is for a dose increase, new dose does not exceed 84 mg (3 nasal spray devices) per week.

Approval duration: 6 months

B. Major Depressive Disorder with Suicidal Ideation or Behavior
1. Re-authorization is not permitted. Members must meet the initial approval criteria.

Approval duration: Not applicable

C. Other diagnoses/indications (must meet 1 or 2):
1. Refer to the off-label use policy for the relevant line of business if diagnosis is NOT specifically listed under section III (Diagnoses/Indications for which coverage is NOT authorized): CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace and CP.PMN.53 for Medicaid.

III. Diagnoses/Indications for which coverage is NOT authorized:
A. Non-FDA approved indications, which are not addressed in this policy, unless there is sufficient documentation of efficacy and safety according to the off label use policies – CP.CPA.09 for commercial, HIM.PHAR.21 for health insurance marketplace and CP.PMN.53 for Medicaid, or evidence of coverage documents.

IV. Appendices/General Information

Appendix A: Abbreviation/Acronym Key
FDA: Food and Drug Administration
HAM-D: Hamilton Rating Scale for Depression
MADRS: Montgomery-Âsberg Depression Rating Scale
MDD: major depressive disorder
NMDA: non-competitive N-methyl D aspartate
PHQ-9: Patient Health Questionnaire
SNRI: serotonin norepinephrine reuptake inhibitor
SSRI: selective serotonin reuptake inhibitor
TCA: tricyclic antidepressant
TRD: treatment-resistant depression

Appendix B: Therapeutic Alternatives
This table provides a listing of preferred alternative therapy recommended in the approval criteria. The drugs listed here may not be a formulary agent for all relevant lines of business and may require prior authorization.

*Off-label

### Appendix C: Contraindications/Boxed Warnings

- Spravato is not indicated for the treatment of bipolar depression.
- Contraindication(s):
  - Aneurysmal vascular disease (including thoracic and abdominal aorta, intracranial, and peripheral arterial vessels) or arteriovenous malformation
CLINICAL POLICY

Esketamine

- History of intracerebral hemorrhage
- Hypersensitivity to esketamine, ketamine, or any of the excipients

Boxed warning(s):
- Risk for sedation and dissociation after administration. Monitor patients for at least two hours after administration.
- Potential for abuse and misuse. Consider the risks and benefits of prescribing Spravato prior to using in patients at higher risk of abuse. Monitor patients for signs and symptoms of abuse and misuse.
- Spravato is only available through a restricted program called the Spravato REMS.
- Increased risk of suicidal thoughts and behaviors in pediatric and young adult patients taking antidepressants. Closely monitor all antidepressant-treated patients for clinical worsening and emergence of suicidal thoughts and behaviors. Spravato is not approved for use in pediatric patients. Spravato is available only through a restricted program under a REMS called the Spravato REMS because of the risks of serious adverse outcomes from sedation, dissociation, and abuse and misuse.

- Healthcare settings must be certified in the REMS program and ensure that Spravato is:
  - Only dispensed in healthcare settings and administered to patients who are enrolled in the program.
  - Administered by patients under the direct observation of a healthcare provider and that patients are monitored by a healthcare provider for at least 2 hours after administration of Spravato.
  - Pharmacies must be certified in the REMS and must only dispense Spravato to healthcare settings that are certified in the program.
  - Further information, including a list of certified pharmacies is available at www.Spravatorems.com or 1-855-382-6022.

Appendix D: PHQ-9, MADRS, and HAM-D Rating Scales
- The PHQ-9 is a 9-item multiple choice questionnaire used for diagnosis, screening, monitoring and measuring the severity of depression.

<table>
<thead>
<tr>
<th>PHQ-9 Score</th>

</tr>
<tr>
<td>20 – 34</td>
<td>Moderate depression</td>
</tr>
<tr>
<td>&gt; 34</td>
<td>Severe depression</td>
</tr>
</tbody>
</table>

- The HAM-D17 scale is a 17-item depression assessment scale to assess severity of, and change in, depressive symptoms.
### Appendix E: General Information

- Positive responses to therapy include but are not limited to:
  - Previous demonstrated improvement in depressive symptoms
  - Rapid reduction in depressive symptoms and thus rapid reduction in suicidality, either during hospitalization, or during a previous episode of suicidality
  - Improvement from baseline in PHY-9, MADRS, or HAM-D17 score

- The efficacy of Spravato for the treatment of TRD in geriatric patients was evaluated in a 4-week, randomized, double-blind study with patients receiving placebo or Spravato intranasally plus an oral antidepressant (TRANSFORM-3).
  - The trial included patients between the ages of 65 and 74 years old.
  - At the end of four weeks, Spravato plus antidepressant did not achieve statistically significant difference when compared to those receiving placebo plus antidepressant on the primary efficacy endpoint of change from baseline to Week 4 on the MADRS.
  - During the double-blind phase, TEAEs occurred in 70.8% (51/72) of patients receiving antidepressant plus Spravato and 60.0% (39/65) receiving antidepressant plus placebo. Overall, safety results were consistent with those reported in previous esketamine studies in younger adults, including those in patients’ ≥ 75 years old.

### V. Dosage and Administration

<table>
<thead>
<tr>

<td>84 mg/dose</td>
</tr>
</tbody>
</table>

**Induction Phase**

- Weeks 1 to 4:
  - Administer nasally twice per week
  - Day 1 starting dose: 56 mg
  - Subsequent doses: 56 mg or 84 mg

**Maintenance Phase**

- Weeks 5 to 8:
  - Administer 56 mg or 84 mg nasally once weekly
  - Week 9 and after:
    - Administer 56 mg or 84 mg every 2 weeks or once weekly

| Depressive symptoms with MDD with acute suicidal ideation or behavior | Administer in conjunction with an oral antidepressant. | 84 mg/dose |
Indication | Dosing Regimen | Maximum Dose
--- | --- | ---
Administer 56 mg or 84 mg nasally twice weekly for 4 weeks.

VI. Product Availability
Nasal spray: 28 mg of esketamine per device. Each nasal spray device delivers two sprays containing a total of 28 mg esketamine.

VII. References

Coding Implications
Codes referenced in this clinical policy are for informational purposes only. Inclusion or exclusion of any codes does not guarantee coverage. Providers should reference the most up-to-date sources of professional coding guidance prior to the submission of claims for reimbursement of covered services.

Important Reminder
This clinical policy has been developed by appropriately experienced and licensed health care professionals based on a review and consideration of currently available generally accepted standards of medical practice; peer-reviewed medical literature; government agency/program approval status; evidence-based guidelines and positions of leading national health professional organizations; views of physicians practicing in relevant clinical areas affected by this clinical policy; and other available clinical information. The Health Plan makes no representations and accepts no liability with respect to the content of any external information used or relied upon in developing this clinical policy. This clinical policy is consistent with standards of medical practice current at the time that this clinical policy was approved. “Health Plan” means a health plan that has adopted this clinical policy and that is operated or administered, in whole or in part, by Centene Management Company, LLC, or any of such health plan’s affiliates, as applicable.

The purpose of this clinical policy is to provide a guide to medical necessity, which is a component of the guidelines used to assist in making coverage decisions and administering benefits. It does not constitute a contract or guarantee regarding payment or results. Coverage decisions and the administration of benefits are subject to all terms, conditions, exclusions and limitations of the coverage documents (e.g., evidence of coverage, certificate of coverage, policy, contract of insurance, etc.), as well as to state and federal requirements and applicable Health Plan-level administrative policies and procedures.

This clinical policy is effective as of the date determined by the Health Plan. The date of posting may not be the effective date of this clinical policy. This clinical policy may be subject to applicable legal and regulatory requirements relating to provider notification. If there is a discrepancy between the effective date of this clinical policy and any applicable legal or regulatory requirement, the requirements of law and regulation shall govern. The Health Plan
retains the right to change, amend or withdraw this clinical policy, and additional clinical policies may be developed and adopted as needed, at any time.

This clinical policy does not constitute medical advice, medical treatment or medical care. It is not intended to dictate to providers how to practice medicine. Providers are expected to exercise professional medical judgment in providing the most appropriate care, and are solely responsible for the medical advice and treatment of members. This clinical policy is not intended to recommend treatment for members. Members should consult with their treating physician in connection with diagnosis and treatment decisions.

Providers referred to in this clinical policy are independent contractors who exercise independent judgment and over whom the Health Plan has no control or right of control. Providers are not agents or employees of the Health Plan.

This clinical policy is the property of the Health Plan. Unauthorized copying, use, and distribution of this clinical policy or any information contained herein are strictly prohibited. Providers, members and their representatives are bound to the terms and conditions expressed herein through the terms of their contracts. Where no such contract exists, providers, members and their representatives agree to be bound by such terms and conditions by providing services to members and/or submitting claims for payment for such services.

**Note:**

For Medicaid members, when state Medicaid coverage provisions conflict with the coverage provisions in this clinical policy, state Medicaid coverage provisions take precedence. Please refer to the state Medicaid manual for any coverage provisions pertaining to this clinical policy.
